i started the time management genre with the 7 games of hercules. Since they do not create any more games for that series, i started browsing around for other games like this. this game is actually put together a lot better as hercules and you need to use a larger portion of your brain to complete this game.

story : really not interesting

gameplay : fluent

niciest thing i noticed, campfires to shine light upon a work area, actually burn out over time

biggest con, after each level, it takes about 12 seconds for the game to show a score screen with 'skip' option to start playing the next level.... Pretty easy time management game, but not bad. Still not a fan of the fog of war, but it bugged me less than it did in Island Tribe 1. However, it gets a downvote from me because [the fourth bonus level doesn't work. a bug that's been known since 2011 and was supposedly fixed in 2012. Did they upload an old build to Steam or something?](#)
